FLESHNER & KIM, LLP P.O. BOX 221200 CHANTILLY, VA 20153			ORGAD, EDAN	
			ART UNIT	PAPER NUMBER
			2684	
DATE MAILED: 11/16/2005				

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/639,120

Applicant(s)

KIM ET AL.

Examiner

Edan Orgad

Art Unit

2684

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 9/14/05.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 22-27 is/are allowed.
- 6) ☒ Claim(s) 1,2,4,6,7,11,12,14 and 16-18 is/are rejected.
- 7) ☒ Claim(s) 3,5,8-10,13,15 and 19-22 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, with respect to claims 1-7 and 11-18 have been fully considered and are persuasive. The final office action dated 6/29/05 has been withdrawn.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 7, 11, 12, 14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Haft, von Puttkamer (DE 298 13 462 U)

Regarding claims 1 and 11, Haft teaches a belt clip device for a mobile communication terminal unit (see abstract) comprising: a terminal unit holder for receiving and holding the terminal unit (figure 3); a clamp provided (figure 4, element 4), on one side of the terminal unit holder and adapted to resiliently clip a belt worn by a user between first and second clamp arms of the clamp (title of invention: fixing to a belt) can attach to a belt and is a hook shape thereby comprising a first and second clamp arms (element 4, although intended use is for a car vent, a user may opt to use it to clip to belt, argument can be made that element 21 is the belt clip, however, the claim is written broadly and therefore examiner believes that element 4 can be utilized to clip to belt as well as element 21. Furthermore, each clamp in element 4 does have a hook like notch and since claim language does not define the direction of the hook, element 4,

Art Unit: 2684

does comprise a hook), thereby allowing the belt clip device to be mounted to the belt; and connecting means for rotatably connecting the clamp to the terminal unit holder (element 228). Haft further disclose a device for flexibly attaching a terminal unit where the terminal unit is rotatable in a plane extending substantially perpendicular to the front surface of the clamp (figure 3, clamp 4- is 90 degrees with respect to the mobile device).

Regarding claims 2 and 12, Haft teaches the first clamp arm (element 4) comprises a base portion and the second clamp arm (element 4) comprises a panel portion hingably coupled (figure 2, element 4, 41 and 22) at one end thereof to the base portion and spaced apart from the base portion to define a gap for receiving the belt there between and wherein the clamp further comprises a spring adapted to urge the base portion and the panel portion in such a fashion that the gap is resiliently maintained (figure 2, element 4, 22 and 31).

Regarding claims 4 and 14, Haft teaches wherein the first clamp arm comprises a base portion and the second clamp arm comprises a tension panel portion connected at one end thereof to the base portion in such a fashion that it is resiliently supported by the base portion, the tension panel portion serving to resiliently clip the belt (fig. 2, element 22, 31 and 4).

Regarding claims 6 and 16, Haft teaches the connecting means comprises: a hinging member arranged between the terminal unit adapter and the clamp, the hinging member being hingably coupled to the first clamp arm of the clamp in such a fashion that it hinges about a hinge shaft with respect to the clamp while being rotatably coupled to the terminal unit holder; and a rotating shaft for rotatably coupling the terminal unit holder to the hinging member in such a fashion that the terminal unit holder rotates about the rotating shaft with respect to the hinging member (figure 2, elements 4, 31, 22 and 31).

Regarding claims 7, Haft teaches an angular position holding means for holding an angular position of the terminal unit holder with respect to the hinging member (figure 3, element 4 and 31 & figure 2, elements 4, 41, 2 and 31).

Regarding claim 17, Haft teaches the connecting device further comprises a rotating shaft for rotatably coupling the terminal unit holder to the hinging member such that the terminal unit holder rotates about the rotating shaft with respect to the hinging member (figure 3, element 4 and 31 & figure 2, elements 4, 41, 2 and 31).).

Regarding claim 18, Haft teaches an angular position holding device configured to hold an angular position of the terminal unit holder with respect to the hinging member (figure 3, element 4 and 31 & figure 2, elements 4, 41, 2 and 31).

***Allowable Subject Matter***

Claims 3, 5, 8-10, 13, 15 and 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 3 and 13, the prior art of record fails to specifically teach a stopper provided at the other end of the panel portion and adapted to prevent the clamp from being separated from the belt.

Regarding claims 5 and 15, the prior art of record fails to specifically disclose the clamp further comprises a stopper provided at the other end of the tension panel portion and adapted to prevent the clamp from being separated from the belt.

Regarding claims 8-10 and 19-21, please see reasons for allowance dated 2/26/04 in office action # 6.

Claims 22-27 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 22, 23, 25 and 26, please see reasons for allowance dated 2/26/04 in office action # 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Please see PTO-892

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edan Orgad whose telephone number is 571-272-7884. The examiner can normally be reached on 8:00AM to 5:30PM with every other Friday off..

Art Unit: 2684

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 571-272-7882. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
